AMORIUM: A PROVINCIAL CAPITAL IN THE SETTING OF THE BYZANTINE EMPIRE

Friday 25th and Saturday 26th, November 2016, Athens, Greece

A workshop organized by the:
Amorium Urban Archaeology Project
INSTITUTE FOR MEDITERRANEAN STUDIES / FORTH

with the support of STAVROS NIARCHOS FOUNDATION

Venue: Greek Archaeologists Union building
134 Ermou str. Thiseio

The city of Amorium, located in Phrygia in the Asia Minor highlands, has been under excavation and systematic research for almost three decades. A large number of scientific publications, articles in peer-reviewed journals, and a special series dedicated to Amorium, the *Amorium Reports* that number already five volumes, have seen the light as the main research products of this archaeological activity along with considerable amount of popularizing guide books. The impact of Amorium excavation has affected considerably the contemporary archaeological approach to Byzantine Early Medieval and Middle Byzantine cities.

Amorium has also been the stage of international cooperation for many years, and in this way it continues to bring together scholars from Turkey with colleagues from across the world. Many of our historical questions though are in an early stage, seeking for answers that the continuation of the excavation and new research will provide. At the same time innovative archaeological methods (e.g. geophysical survey, satellite imagery, LIDAR modelling) and modern approaches are being applied at Amorium, making the project one of the pioneers in the field of Byzantine archaeology.

Aim of this workshop is to bring together the members of Amorium Excavations team to confer on the most recent field work and state of research. Additionally we hope to further establish a dialogue on Amorium with other scholars of Byzantium that face similar historical and archaeological questions. In the center of such a discourse stand the challenges of Byzantine historical archaeology and our understanding of the period between the 7th and 11th c. AD, and the evolution of Byzantine urbanism with the formation of “new” or renewed urban centers as provincial capitals, this largely being the essence of the new thematic system. This process is evident in the field, but also is elucidated in the historical sources. In result our two-day thematic workshop will address all kind of questions on material culture, architecture, landscape archaeology, textual history and many more concerning the Middle Byzantine cities.

All presentations and discussion will be in English.

ΑΜΟΡΙΟΝ: ΜΙΑ ΕΠΑΡΧΙΑΚΗ ΠΡΩΤΕΥΟΥΣΑ ΣΤΟ ΠΛΑΙΣΙΟ ΤΗΣ ΒΥΖΑΝΤΙΝΗΣ ΑΥΤΟΚΡΑΤΟΡΙΑΣ

Αθήνα, Παρασκευή 25 και Σάββατο 26 Νοεμβρίου 2016,

Μια επιστημονική συνάντηση που οργανώνεται από το
Πρόγραμμα Αστικής Αρχαιολογίας Αμορίου
ΙΝΣΤΙΤΟΥΤΟ ΜΕΣΟΓΕΙΑΚΩΝ ΣΠΟΥΔΩΝ / ΙΤΕ

με την υποστήριξη του ΙΔΡΥΜΑΤΟΣ ΣΤΑΥΡΟΣ ΝΙΑΡΧΟΣ

Χώρος: Σύλλογος Ελλήνων Αρχαιολόγων, Ερμού 134, Θησείο

Η πόλη του Αμορίου, που εντοπίζεται στα υψίπεδα της κεντρικής Μικράς Ασίας στην ευρύτερη περιοχή της Φρυγίας, αποτελεί πεδίο ανασκαφών και συστηματικής έρευνας για τουλάχιστον τρεις δεκαετίες. Αποτέλεσμα αυτής της δραστηριότητας είναι η παραγωγή ενός σημαντικού αριθμού επιστημονικών δημοσιεύσεων, άρθρων σε έγκριτα διεθνή περιοδικά και μιας ειδικής σειράς δημοσιεύσεων αφιερωμένης στο Αμόριο, που ονομάζεται *Amorium Reports* αριθμώντας ήδη πέντε τόμους, με παράλληλη φροντίδα για εκλαϊκευτικούς αρχαιολογικούς οδηγούς. Ο αντίκτυπος της ανασκαφής του Αμορίου έχει επηρεάσει σημαντικά τη σύγχρονη αρχαιολογική προσέγγιση σχετικά με τις πόλεις της Πρώιμης και κυρίως της Μέσης Βυζαντινής περιόδου.

Το Αμόριο έχει αποτελέσει για πολλά χρόνια πρόσφορο πεδίο διεθνών συνεργασιών, και υπό αυτή την έννοια συνεχίζει να φέρνει σε επαφή επιστήμονες από την Τουρκία με συναδέλφους τους από όλο τον κόσμο, μεταξύ των οποίων και από την Ελλάδα. Πολλά από τα ιστορικά μας ερωτήματα βρίσκονται ακόμα σε πρώιμο στάδιο, αναζητώντας πειστικές απαντήσεις μέσα από τη συνέχιση των ανασκαφών και των νέων ερευνών. Ταυτόχρονα, η εφαρμογή καινοτόμων αρχαιολογικών μεθόδων και σύγχρονων προσεγγίσεων (π.χ. γεωφυσική έρευνα, δορυφορικές επισκοπήσεις, μοντελοποίηση LIDAR) καθιστούν το πρόγραμμα του Αμορίου ως ένα από τα πρωτοπόρα στον τομέα της Βυζαντινής Αρχαιολογίας.

Σκοπός αυτού του εργαστηρίου μελέτης είναι να φέρει κοντά τα μέλη της ερευνητικής ομάδας των ανασκαφών του Αμορίου ώστε να παρουσιάσουν τα πιο πρόσφατα αποτελέσματα των ερευνών τους. Ταυτόχρονα, φιλοδοξεί να προωθήσει τον διάλογο και με άλλους μελετητές του Βυζαντίου που αντιμετωπίζουν παρόμοια ιστοριογραφικά και αρχαιολογικά ερωτήματα. Στο κέντρο μιας τέτοιας συζήτησης τίθενται οι προκλήσεις της βυζαντινής ιστορικής αρχαιολογίας αλλά και η καλύτερη κατανόηση της περιόδου μεταξύ του 7ου και του 11ου αι. Ξεχωρίζει το ερώτημα της εξέλιξη της βυζαντινής πολεοδομίας με το σχηματισμό «νέων» ή ανανεωμένων αστικών κέντρων που λειτούργησαν ως επαρχιακές πρωτεύουσες και σε μεγάλο βαθμό αποτέλεσαν τον πηρύνα του νέου θεματικού συστήματος. Στο πλαίσιο αυτό, στην διάρκεια δυο ημερών θεματική επιστημονική συνάντηση θα εξεταστούν ερωτήματα σχετικά με τον υλικό πολιτισμό, την αρχιτεκτονική, την αρχαιολογία του τοπίου, τις ιστορικές πηγές και πολλά άλλα που αφορούν τις πόλεις της Μέσης Βυζαντινής περιόδου.

Όλες οι παρουσιάσεις και συζητήσεις της συνάντησης θα είναι στα Αγγλικά.

AMORIUM: İMPARATORLUĞA RAKİP BİR BİZANS EYALET BAŞKENTİ

25 Kasım Cuma - 26 Kasım Cumartesi 2016, Atina, Yunanistan

Kentsel Amorium Arkeoloji Projesi Tarafından Organize Edilen Uluslararası Çalıştay

AKDENİZ ÇALIŞMALARI ENSTİTÜSÜ /FORTH

STAVROS NIARCHOS VAKFI TARAFINDAN FİNANSE EDİLİR

Yer: Yunan Arkeologlar Derneği Binası- 134 Ermou Caddesi, Thiseio

Anadolu'nun dağlık bölgesi Frigya'da yer alan Amorium'da neredeyse 30 yıldır sistematik araştırma ve kazı çalışmaları yürütülmektedir. Şimdiden beşinci baskısına ulaşan ve büyük miktarda bilimsel yayın, hakemli dergilerde makale ve Amorium'a adanan özel serilerden oluşan "Amorium Raporları" çok sayıda popüler rehber yayında, arkeolojik faaliyetlerin ana kaynağı olarak görülmektedir. Amorium Kazısı Erken Bizans ve Orta Bizans şehirlerine modern arkeolojik yaklaşımı büyük ölçüde etkilemiştir.

Ayrıca Amorium yıllardır uluslararası işbirliğinin sahne olmuştur ve bu yolla dünya genelinde meslektaşları ile Türkiye'den akademisyenleri bir araya getirmeye devam etmektedir. Erken evrede hala birçok tarihsel sorularımız olmasına karşın, devam etmekte olan kazılardan ve araştırmalardan yeni cevaplar ortaya çıkacaktır. Aynı zamanda Bizans arkeolojisi alanındaki projelerin öncüllerinden olan yenilikçi arkeolojik metodlar (jeofizik araştırma, uydu görüntüleri, LIDAR modelleme vs.) ve modern yaklaşımlar da Amorium'da uygulanmaktadır.

Bu seminerin amacı Amorium kazı ekibini bir araya getirip en son çalışma alanları ve çalışmaların durumunu görüşmek oluşturmaktadır. Aynı zamanda ümit ediyoruz ki, Bizans alanında benzer tarihi ve arkeolojik sorunlar üzerine çalışan araştırmacılar ile Amorium hakkında dialog kurabiliriz. Böyle bir tartışmanın merkezinde tarihsel Bizans arkeolojisinin zorlukları ve M.S. 7. ve 11. yüzyıllar arasındaki periyodunu anlayabilmek ve yeni tematik sistemin büyük ölçüde esasını oluşturan eyalet başkentleri olarak; "yeni" ya da yenilenen kent merkezlerinin oluşumu ile Bizans kentleşmesinin evrimi yer alır. Alandaki gelişme oldukça açıktır ama bu gelişmede tarihi kaynakların da önemi yadsınamaz. İki günlük tematik çalıştayın sonunda Orta Bizans şehirlerine ilişkin; maddi kültür, mimari, peyzaj arkeolojisi, metinsel tarih ve daha bir çok soru ele alınacaktır.

Tüm sunumlar ve tartışmalar İngilizce olacaktır.
